DETAILED ACTION

Double Patenting

The Provisional Obviousness-type Double Patenting rejection dated 9/7/2007 has been **withdrawn** since the instant application is the earlier filed application of two pending applications, and since the Double Patenting rejection is the only rejection remaining in the instant application.

Allowable Subject Matter

1. Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1-28 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claim 1, "the picture quality improving unit analyzes green input data to determine a brightness of the frame". In claim 10, "an image signal modulation unit that analyzes input green data from input data for a frame to determine the brightness of the frame". In claim 22, "producing a brightness histogram using input green data of input data from a frame that indicates brightness information". The closest prior art of record however singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ricardo L. Osorio whose telephone number is 571-272-7676.
